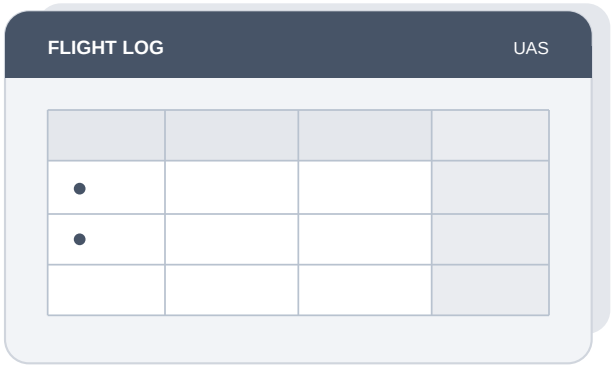
UAS Remote Pilot Logbook

Flight records for drone missions



PILOT _____

PHONE NUMBER _____

LOG PERIOD

From _____ **To** _____

RECORDKEEPING

- Flight Activity
- Mission and Location
- Authorizations
- Flight and Time Totals

How to use this logbook

Record flights, calculate totals, and stay organized.

Instructions

Getting Started

1. Write your name and phone number on the cover page.
2. On the first flight record page, write your name in `Pilot` and `1` in the bottom-right `Page` field.
3. Write the first record in the top row. Use the Definitions at right.
   A row can cover one flight, several flights, or one day's flights.
4. Copy the first row's date to `Log Period` `From` on the record and cover pages.
   Leave `To` blank.
5. Set both `Carry Forward` boxes to `0` on the first record page.
   See Keep Flying for later pages.

Keep Flying

1. When a page is complete, total `Flights` and `Flight Time`.
   Write each sum in `Page Total`.
2. Add each `Page Total` to `Carry Forward`. Write each result in `Total`.
3. Add a record page when you need more space. Write its number in `Page`.
   Copy each prior-page `Total` to the matching `Carry Forward` box.
4. For each new page, write the first row's date in `Log Period` `From`.
   For every record page, write the last row's date in `To` when complete.
5. Use one cover and one set of record pages for each calendar year or other log period.
   When finished, complete `Log Period` `To` on the cover.

Definitions

Date	Date for the row.
Mission	Purpose, project, or client reference.
Location	Launch site or operating area.
Aircraft	Fleet ID, registration number, or make and model.
Op Type	Operation type: recreational, Part 107, or public aircraft.
Authorization	Approval reference: LAANC, waiver, COA, N/A, etc.
Flights	Number of flights in the row.
Flight Time	Total time: 15 min, 0:15 (h:mm), or 0.25 h. Use one format.
Notes	Exceptions, unusual circumstances, etc.
Carry Forward	Values copied from the prior page's Total row.

Part 107 and 49 U.S.C. 44809

- For most Part 107 operations and operations under 49 U.S.C. 44809, the FAA does not require a general flight-activity log or specify fields for one.
- Some regulations, including Part 107 Category 4 rules, and some waivers, authorizations, or COAs require specific records. Employers, clients, and insurers can also require records. This logbook may not include all required information.

IMPORTANT

This logbook is a practical record. It is not proof of compliance or legal advice. Confirm current FAA rules and each waiver or authorization before an operation.
